

Great practical ideas for adding to groups together.

Make your own adding mat.

This is great fun!

Make your own adding machine using two cups, toilet roll and lots of tape ☺

A super idea if you have any dominoes or make your own ☺

Pegs are great for counting! Using a coat hanger is also fab to show different ways to make the same total. E.g $5+3=8$ then turn the hanger around and look it' $3+5=8$
