<https://www.youtube.com/watch?v=7zMPy6VgAyo>

Collect 3 leaves	Take away - 2
	$3 - 2 = \square$

Collect 15 sticks	Take away - 3
	$15 - 3 = \square$

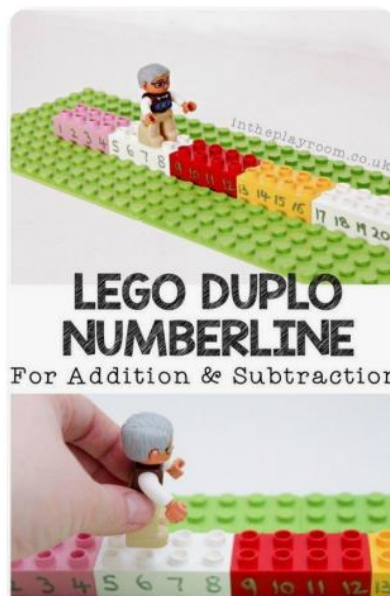

Collect lots of natural objects to take away with.

Practical ways to subtract

I love this simple idea using chalks to draw and a paint brush to cross off the given amount.

Play dough smash

Lego is great to take away with. Ask your child to build a tower of ten then take away a given number. How many is left? Also fab to make a number line to show how lego man can jump back along your lego number line.
