

Thursday -Challenge time
Have fun with these ideas and activities
to support your child's learning.

What Are We Learning?

We are learning to count things other than objects, such as sounds.

How to Set up the Challenge

- Find a money box or a jar.
- Count out ten 1p coins and place these next to the money box or jar.
- As you slowly drop each coin into the money box, it will make a sound that can be counted.

How to Get Your Child Thinking

- How many coins did I put in the money box?
- How do you know?
- What did you do to help you to count the coins?

- Cover your eyes and listen carefully.
- Your grown-up will slowly drop some coins into the money box.
- How many did they drop?

Can you buy two items and add up the
total amounts?

Use your adding machine to help you.
